

Visualize some part of the dataset

By Reham Metwally Maree

Introduction

WeRateDogs is a Twitter account that rates people's dogs with a humorous comment about the dog. These ratings almost always have a denominator of 10. The numerators however are almost always greater than 10 (11/10, 12/10, 13/10, etc.). In theory the rates should be 1 to 10. However, WeRateDogs disagree, they admit almost all dogs deserve a 10 and sometimes more than that. WeRateDogs has over 6 million followers and has received international media coverage. One of those coverage were about the quote *"they're good dogs Brent"*, this was an exchange in which WeRateDogs shut down a person having an issue with its rating system in humorous ways.

Insights:

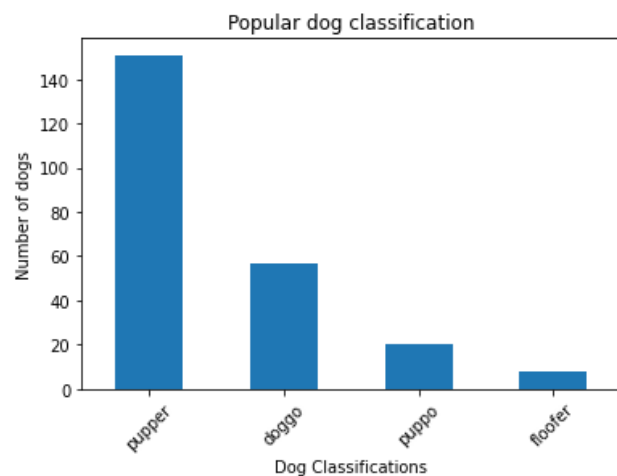

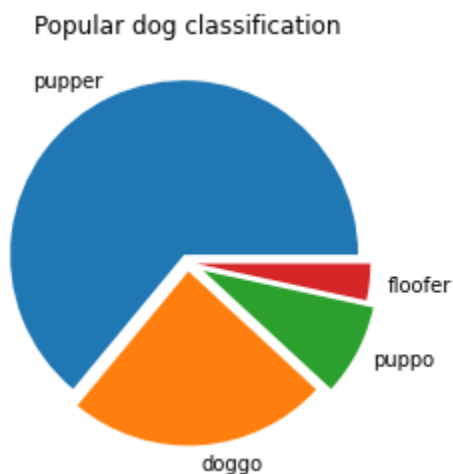

Most common dog type:

WeRateDogs has over 6000+ tweets. I was able to analyzed around 1500+ tweets. The most rated dog was golden retriever with more than 140 ratings.

Popular dog classification:

Pupper is the most frequent dog stage in the dataset.

Retweet counts

Amazingly many tweets have been retweeted more than 1000 times some more than even 50000 times. There is not a clear relationship between the ratings and the retweets.

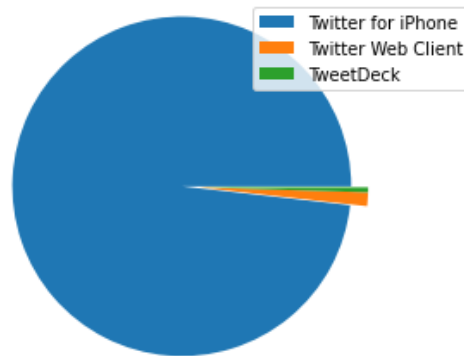

Favorites counts:

There is a correlation between the number of tweets and the number of favorites it gets.

The Most Source People Using:

The result shows that there are 1671 people used Twitter for iPhone(98.22%), 20 people used Twitter Web Client(1.30%), and 8 people used TweetDeck(0.48%). **So, most people using Twitter for iPhone to access Twitter.**

The most breed of dog people love:

Golden Retriever is the most popular dog breed in the dataset with both the highest likes, and retweets.
